- Drill

# READ THESE INSTRUCTIONS THOROUGHLY BEFORE INSTALLATION KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE. **IMPORTANT:**

This product must be installed by a qualified electrician or competent person, and in accordance with current building and IET wiring regulations.

### Warranty:

This luminaire is warranted for a period of 5Years from the date of purchase\*\*. The warranty could be invalidated should the light fitting not be installed according to these instructions, outside the scope of the specification or the product has been altered or tampered with in any way. Please see website for terms and conditions.

# WARNING: Risk of electric shock! Isolate the mains power before proceeding.

- Turn off the mains power before performing inspections, installation, or removal
- Verify that the supply voltage is correct by comparing it with the luminaire label information
- It is the installers responsibility to ensure installation is suitable for the total load of the luminaire(s). The supply cable, fuses/circuit breakers must be correctly rated for the electrical load and considering for any transient inrush currents that may occur.
- Do not perform insulation strength or resistance tests on installed luminaire(s) connected

## Wiring instructions for units equipped with EMERGENCY function:

Emergency lighting luminaire must be installed and maintained in accordance with the emergency lighting standard BS 5266-1

- For the emergency unit to work correctly, please ensure that an uninterrupted permanent live feed is
  present and is connected directly to the 'Permanent Live' terminal of the mains terminal block. Please
  ensure there are no switches, PIRs etc within the permanent live feed, constant switching of the
  emergency pack could result in premature battery failure.
- Following power up the green LED indicator should illuminate to indicate charging. If power to the unit is
  disrupted or isolated, the unit indicating green LED will switch off, triggering the emergency LEDs to
  illuminate.
- When self-test mode is selected, 24hrs from connection to mains power, a 3hrs duration test will be performed automatically.

#### Installation Procedure:

- 1. Route the correct 3-Core or 4-Core cable type according to the location of the light fitting. Secure the supplied wall plugs to the surface where you require to mount.
- 2. Separate the body from the diffuser.
- 3. Secure the base of the fitting to the wall or ceiling.
- 4. Feed the cable through the entry point and wire into the terminal block Standard Version.
- 5. Feed the cable through the entry point and wire into the terminal block Emergency Version.
- 6. Re-fit the diffuser.
- 7. Screw in the remaining retaining screws.
- 8. Reconnect the mains supply.
