Box Contents:

- Wimbledon Court Sports Light
- Mounting Bracket

Tools Required For Installation:

- Wire Strippers / Cutters
- Spanner / Socket Set
- Screwdrivers
- Hex Keys
- Spirit Level

READ THESE INSTRUCTIONS THOROUGHLY BEFORE INSTALLATION
KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE.

IMPORTANT:

This product must be installed by a qualified electrician or competent person and in accordance with current building and IET wiring regulations.

Warranty:

This luminaire is warranted for a period of 5 years from the date of purchase**. The warranty could be invalidated should the light fitting not be installed according to these instructions, outside the scope of the specification or the product has been altered or tampered with in any way. Please see website for terms and conditions.

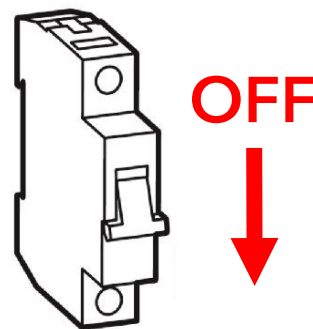

WARNING: Risk of electric shock!
Isolate the mains power before proceeding.

- Turn off the mains power before performing inspections, installation or removal.
- Verify that the supply voltage is correct by comparing it with the luminaire label information.
- It is the installer's responsibility to ensure installation is suitable for the total load of the luminaire(s). The supply cable, fuses/circuit breakers must be correctly rated for the electrical load and considered for any transient inrush currents that may occur.
- Do not perform insulation strength or resistance tests while installed luminaire(s) are connected.

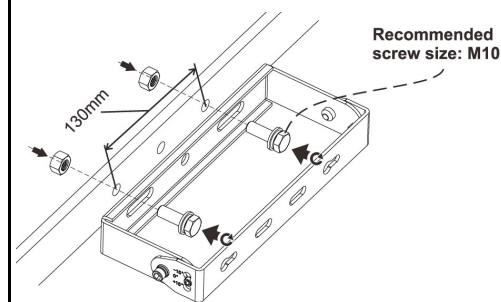

Installation Procedure:

1. Ensure power is off and safe isolation procedures are followed.
2. Securely fix the bracket to its mounting position, either a solid structure or the Wimbledon Court Sports Light Post Mount.
3. Carefully loosen the bolts from the side of the Wimbledon Court Light, take care to not unscrew them from the casing completely.
4. Slide the loosened screws into the mounting holes of the bracket and lock into position by tightening with a suitable tool.
5. Check that the Wimbledon Court Light is level. If adjusting the angle of the light fitting make careful adjustments to the mounting bracket before affixing the luminaire.
6. If installing the 320W multi-watt version, the IP rated power selector is located external to the driver box. Open the cover and select desired wattage on the switch.
7. Disassemble the IP rated mains connector. Securely connect Live (Brown), Neutral (Blue) and Earth (Yellow/Green) wires to relevant terminals. Then securely close the connector. For the DALI option securely connect the DALI input wires.
8. Turn on the mains supply and test the operation of the luminaire.
